

## QuickStart Guide — Standalone

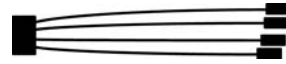

### 1. Unpack all items

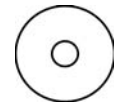

Musi-Can

Power cord

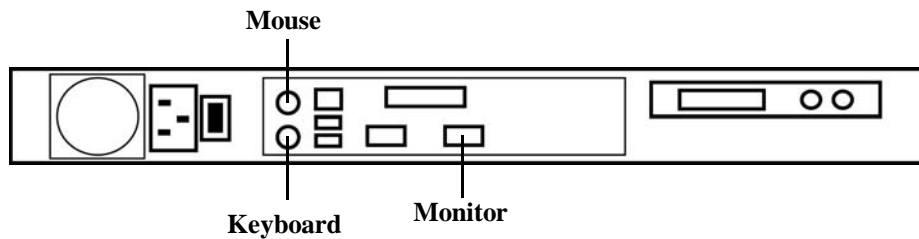

Audio card connectors

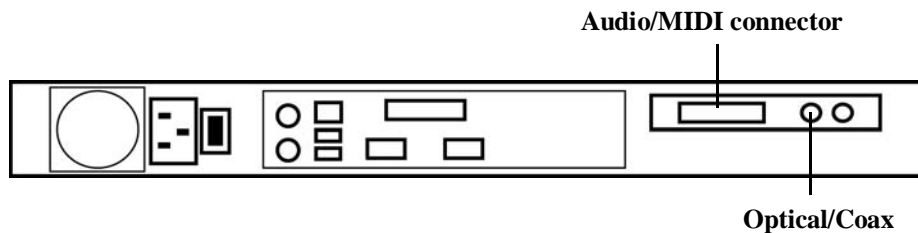

Software and Documentation

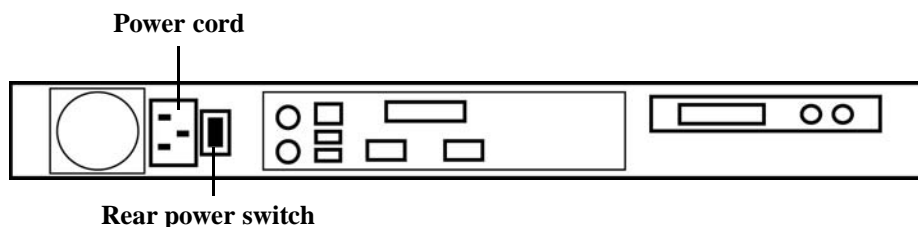

### 2. Connect keyboard, mouse, and monitor

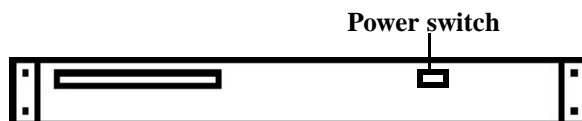

### 3. Connect audio/MIDI/optical/coax cables

### 4. Insert power cord, plug into outlet, turn on rear switch

## 5. Press power switch in front and let Musi-Can boot

## 6. Windows will recognize monitor, click Next/Finish buttons \*

\* If you are using an older or non Plug and Play monitor, Windows will skip this step.

**Your Musi-Can is now ready for use. Depending on your configuration, you will either boot into the standard Windows Explorer desktop, or if Gigastudio was preinstalled at the factory, you will boot straight into Gigastudio.**

**For more information on how to use Gigastudio and the supporting software on the Musi-Can, please see the Coyote R&D Musi-Can User's Guide.**
